

Course Code: RP01

Course Title: Primavera P6 Overview & Reports Course

Course Précis This course is designed for those who wish to access the Primavera system but don't necessarily require the understanding of the planning & scheduling aspects.

A hands on course, this will take the participants through the basics of interrogating the system and at the completion of the course will be able to create and print basic layouts and reports utilising both the report wizard and report writer tool.

Duration: 1 day
