

# LEAN EXPERT

## Address complex business issues

Learn how to engage the wider business in Lean thinking through alignment of Lean initiatives with your business strategy. This will provide focus and start engaging the wider organisation in a different way of thinking which in turn can enable dramatic improvements in your business performance.

### PMI's Lean Expert training ensures you will:

- Be capable of leading cross functional Lean based projects
- Improve your analytical skills to further understand waste
- Understand how to use a range of advanced Lean tools for both project based improvement and daily process management
- Be able to define, visualise, communicate and improve the end to end value stream for a process, function or business
- Be able to influence and coach a range of stakeholders in the Lean change process and new ways of thinking.

### Engaging your organisation

As a Lean Expert you will be able to influence and coach a range of stakeholders in the Lean change process. You will also introduce a new way of thinking which will enable dramatic improvements to be made in your business performance using cross functional events.
