

# LEAN SIX SIGMA WEBINARS

## Lean Six Sigma White Belt

### WAYS TO EXPERIENCE THIS COURSE:

In-house

Custom

Comprising 6 x 3 hr LIVE, interactive, consultant-led webinars, the Lean Six Sigma White Belt introduces some simple tools to allow you to really make a difference to the way you work and the results you can achieve. Each Lean Six Sigma webinar allows you to interact with other delegates, talk to a consultant, ask real-time questions and get a chance to practice your learning through simulations.

AM: 09:00 - 12:00 UK Time  
PM: 14:00 - 17:00 UK Time

**Good for you, your team and your organisation** - whether you attend just one or all six, these webinars are a great way to introduce the methods and tools of Lean Six Sigma across the organisation and introduce newcomers to process improvement – enabling everyone to deliver higher quality, quicker!

### 1. Understand your work - How to Map a Process

By attending this webinar you will be able to use different types of flowcharts to clarify what needs to be done and by whom. You and your organisation can build a shared picture of your processes and you can start to uncover duplication of effort, as well as unnecessary steps and delays.

### 2. Become more efficient - How to Identify Waste

After this course you will be able to identify defects that can affect the end user – your customer. You will gain a structured method to clearly identify opportunities for improvement within a process and create the groundwork for continuous improvement.

### 3. Sustain your successes - How to Standardise a Process

This webinar will help you build a shared commitment to a common way of working. You will gain techniques that will enable you to engage with others and increase buy in to sustain the improvements you have made.

### 4. Understand performance - How to Measure a Process

Learn how to set priorities around what to measure and what not to measure. This webinar is designed to help you balance your performance so you are effective for your customer and efficient for your business.

### 5. Make the right decisions - How to Use Control Charts

All things vary – the important thing is to know what to react to and when. After this webinar you will have the tools to focus on the real indications of a change in your processes.

### 6. Create clarity for all - How to Use Visual Management

Help team members feel more engaged in your processes with the use of a management structure that will enable you all to see 'at-a-glance' what is going. This webinar will show you how to structure a visual management board and gain clarity of purpose and transparency of the process.

### \*SPECIAL OFFER\*

If you purchase a Lean Six Sigma White Belt, you will receive Lean Six Sigma Online Yellow Belt **for FREE**. That's an extra £250 worth of training!
