

## ORACLE PRIMAVERA EDUCATION SERIES

<b>Course Title</b>	Primavera Unifier: Reports and Dashboards
<b>Course Code</b>	P605
<b>Version Relevance</b>	Release 16
<b>Course Duration</b>	2 days
<b>Course Delivery</b>	Classroom
<b>Course Audience</b>	Administrator, System Administrator
<b>Prerequisite(s)</b>	Primavera Unifier Administration 15
<b>Courseware Author</b>	Oracle University

### COURSE SUMMARY

This Primavera Unifier: Reports and Dashboards training teaches you how to create reports and develop dashboards in the Primavera Unifier Reports and Dashboards solution. To perform data extraction and display, expert Oracle University instructors will also teach you how to configure these dashboards and use native Unifier reporting tools.

This course is appropriate for Oracle Cloud deployments.

#### **Day 1:** Creating User-Defined Reports

This course begins with expert Oracle University instructors teaching you how to create user-defined report templates and update shell templates. The first day concludes with hands-on instruction to expand your skills so you can import, update and schedule user-defined reports.

#### **Day 2:** Viewing Dashboards & Creating Data Cubes

The second day of this course focuses on dashboards. You will view dashboards and then create data cubes, data views and dashboards through hands-on exercises. These exercises will reinforce your learning and help solidify your new skill set so you can apply it to your daily job.

## LEARN TO

- Create report templates
- Update shell templates
- Define permissions
- Create data cubes and data views
- Create dashboards
- Create custom Business Intelligence Publisher reports using data views

## COURSE OBJECTIVES

- Create reports
- Create templates
- Run user-defined reports
- Define data cubes and data views
- Configure dashboards
- View system reports

## COURSE TOPICS

### Report Templates

- Tabular Reports
- Cross-Tab Reports
- Alert Report Templates
- Copying and Editing

### Shell and Company Dashboards

- Creating Dashboards Manually
- Configuring the Dashboard

### Primavera Analytics

- Configure Unifier Objects to Map in Analytics Node
- Build an Analytics Block in a Shell Dashboard

### Shell Templates

- Embedding Report Templates
- Assigning Report Permissions
- Updating and Scheduling

### Data Views

- Creating Data Views
- Creating Data Cube Definitions
- Data Views and User-Defined Reports
